

LED strips

300 LEDs per meter

Technische Fiche

DU PONT
HANDEL EN MAATWERK

Product Feature

- ◆ 300 LEDs per meter, 5 meters per roll, the theoretical power 9.6W/meter, light angle 120 degrees. 8lm per led chip. Can be customized according to needed.
- ◆ Flexible, cuttable, back with 3M double-sided adhesive, can be installed in the concave convex surface, easy to install.
- ◆ Led strip supports external light regulator type: 0/1-10V PWM Dali Dimmable inductive switch controller.
- ◆ Cutting unit is 20mm, 6 led chips can be used as a unit, cutting does not affect other parts. Normal length is 5 meters, other lengths also acceptable.
- ◆ Low power consumption, low fever, no glare, impact resistance, energy saving and environmental conservation.
- ◆ LED can be customized to glue dust (IP65), (IP66), silicone casing plus glue waterproof (IP68);
- ◆ Life time: Mean time between failure (MTBF): 50-100K hour

CE RoHS FC

Technical Parameters

| Mode | LED Q'ty/M | Color temperature | | CRI(Ra) | Voltage (V DC) | Electric current (A/m) | Power $\pm 10\%$ (W/m) | Lm/m $\pm 10\%$ | FPC Width |
|------------------|------------|-------------------|------------|---------|----------------|------------------------|------------------------|-----------------|-----------|
| LM2216-WN300-24V | 300 | White | 6000-6500K | 90+ | 24 | 0.4 | 9.6 | 800 | 10mm |
| | | Natural Wite | 4000-4500K | | | | | | |
| | | Warm white | 2200-3200K | | | | | | |

Safety Information

- The strip itself and all its components may not be mechanically stressed.
- Assembly must not damage or destroy conducting paths on the circuit board.
- Installation of LED ribbon (with power supplies) needs to be made with regard to all applicable electrical and safety standards. Only qualified personnel should be allowed to perform installations.
- Correct electrical polarity needs to be observed. Wrong polarity may destroy the strip.
- Parallel connection is highly recommended as safe electrical operation mode.
- Serial connection is not recommended. Unbalanced voltage drop can cause hazardous overload and damage the strip.
- Please ensure that the power supply is of adapters power to operate the total load.
- When mounting on metallic or otherwise conductive surfaces, there needs to be an electrical isolation points between strip and the mounting surface.
- Pay attention to standard ESD precautions when installing the strip.
- Damaged by corrosion will not be honored as a materials defect claim. It is the user's responsibility to provide suitable protection against corrosive agents such as moisture and condensation and other harmful elements.
